

Dairy Cattle Movement
Bovine Associated Influenza A Syndrome
Highly Pathogenic Avian Influenza [HPAI] H5N1

Guidance for the movement of Dairy Cattle under [Federal Order](#) and [Florida Emergency Rule](#) [Rule 5CER24-6]. Please review USDA [aphis-requirements-recommendations-hpai-livestock.pdf \(usda.gov\)](#) for definitions and testing information.

Dairy Cattle Movement
Bovine Associated Influenza A Syndrome
Highly Pathogenic Avian Influenza [HPAI] H5N1

Interstate Importation of Non-Lactating Dairy Cattle into Florida
(Federal Order does not apply to Beef Cattle)

**Herd - Exposed, Suspected
or Known positive for
Influenza A**

**Cattle cannot
move from an
affected premises.**

**Origin State =
Affected**

**Destination =
Dairy, Farm**

Official Certificate of Veterinary Inspection (CVI) issued within **10 days** of import.

- **Lactation status must be listed on CVI.**
- All cattle on the CVI must have individual official identification. The individual official identification must be recorded on the CVI.
- **The CVI must include a statement that the cattle are both free from, and have not been exposed to, a known contagious and infectious disease.**
- If six months of age or older, Negative Tuberculosis Test within 60 days. Must be listed on CVI.

**Origin State =
Non-Affected**

**Destination =
Dairy, Farm**

Official Certificate of Veterinary Inspection (CVI) issued within 30 days of import.

- **Lactation status must be listed on CVI.**
- All cattle on the CVI must have individual official identification. The individual official identification must be recorded on the CVI.
- **The CVI must include a statement that the cattle are both free from, and have not been exposed to, a known contagious and infectious disease.**
- If six months of age or older, Negative Tuberculosis Test within 60 days. Must be listed on CVI.

**Destination =
Livestock Market or
Slaughter facility**

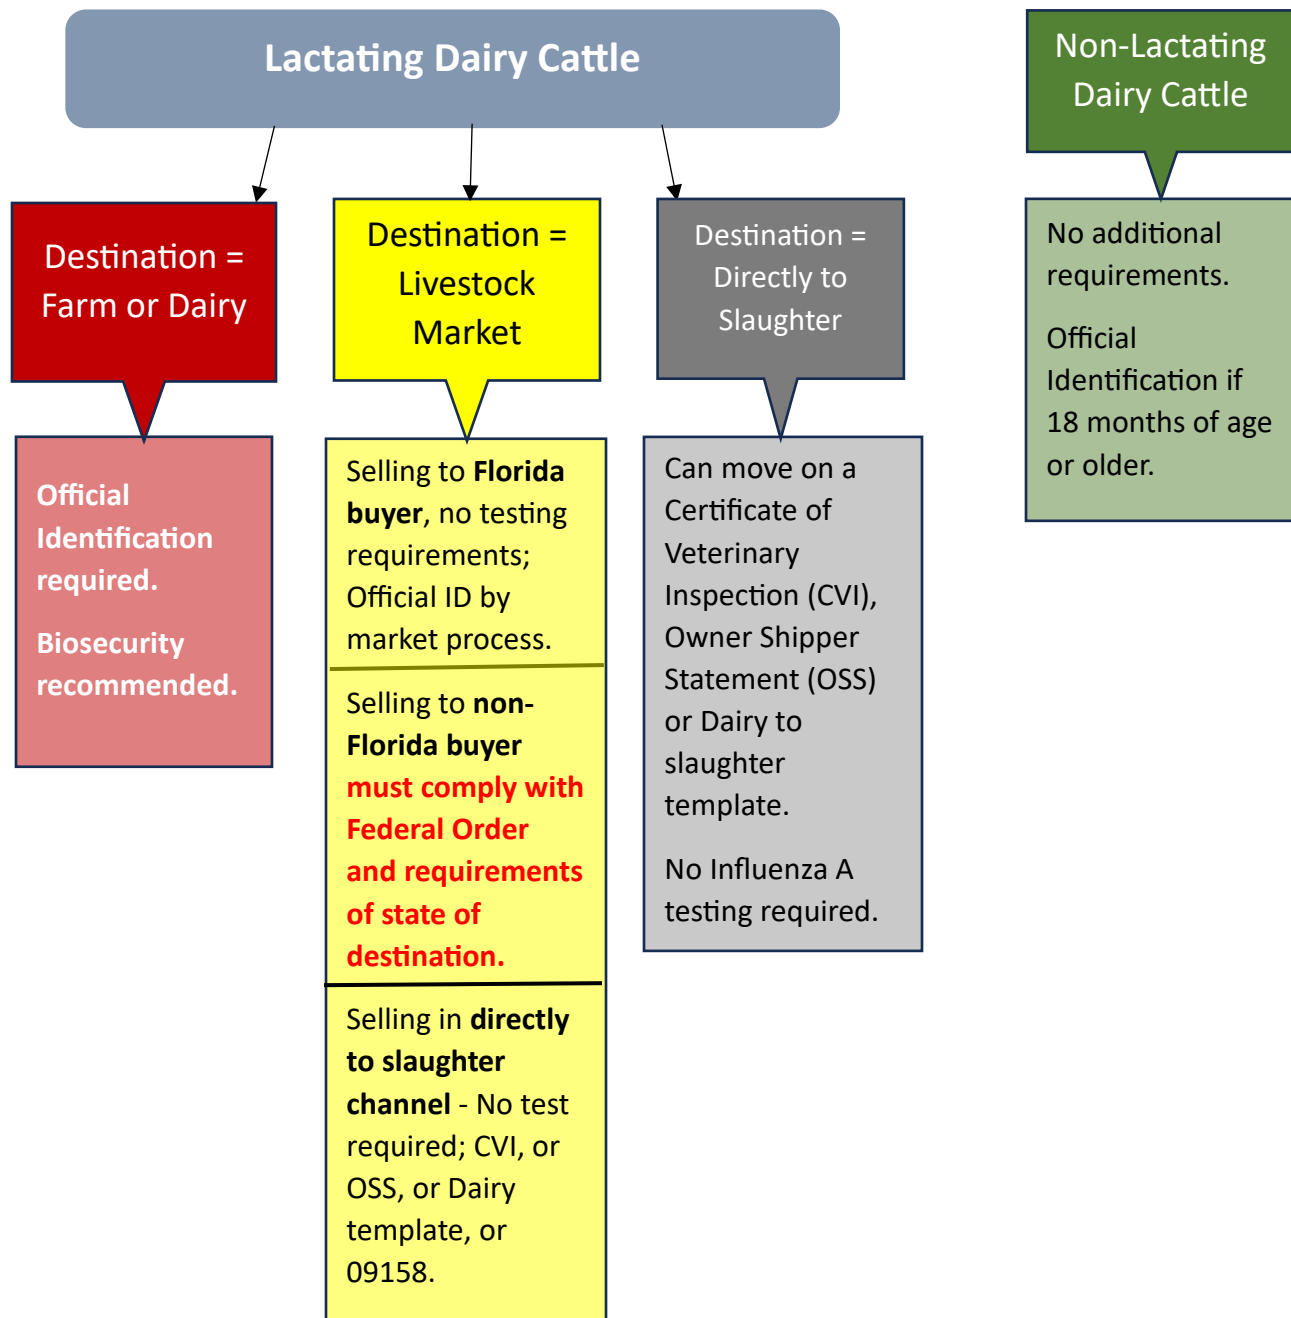

Official Certificate of Veterinary Inspection (CVI), Dairy to slaughter template, or Owner Shipper Statement (OSS) allowed.

- No Influenza A testing required.
- **From an Affected State, the issue date must be within 10 days of entry.**
- From Non-Affected state, the issue date must be within 30 days of entry.

**Red Font = New
requirement or change in
requirements for entry.**

INTRASTATE MOVEMENTS OF FLORIDA DAIRY CATTLE

**Dairy Cattle Movement
Bovine Associated Influenza A Syndrome
Highly Pathogenic Avian Influenza [HPAI] H5N1**

INTERSTATE EXPORT OF FLORIDA LACTATING DAIRY CATTLE

- ✚ Movements from Florida to other states require compliance with the Federal Order and the requirements of the state of destination.

- ✚ Resource for requirements – www.InterstateLivestock.com.

- ✚ Per Federal Order -

Prior to interstate movement, lactating dairy cattle are required to receive a negative test for Influenza A virus at an [approved National Animal Health Laboratory Network \(NAHLN\)](#) laboratory using an NAHLN approved assay.

The interstate movement of all lactating dairy cattle must be accompanied by a Certificate of Veterinary Inspection (CVI) per 9 CFR Part 86, Animal Disease Traceability. The destination/receiving state(s) will continue to use CVIs as a basis to track the interstate movement of lactating dairy cattle.

- All cattle on the CVI must have individual official identification.
- The individual official identification must be recorded on the CVI.
- The CVI must include a statement that the cattle are both free from, and have not been exposed to, a known contagious and infectious disease

- Non-clinical lactating dairy cattle moving interstate direct to slaughter are not required to have a pre-movement test but must move on a Certificate of Veterinary Inspection or other documentation of movement approved by the sending and receiving State Animal Health Officials and provided to the sending and receiving State Animal Health Officials.

- Clinical lactating dairy cattle are ineligible for interstate movement or movement to slaughter

- ✚ Interstate movement for a lactating dairy cow from a sale barn directly to a slaughter facility requires only a Certificate of Veterinary Inspection (CVI) stating that the animal is clinically healthy; no testing is necessary. Alternative movement documents can be used if approved by both states. FL, GA, PA and SC have approved alternative movement documents. This covers FPL, Brown Packing and Cargill direct to slaughter movements. ***Dairy template*** available from Cattle Programs Office (CattleForms@FDACS.gov).

- ✚ **Florida lactating dairy cattle moving to AL and GA livestock markets require negative Influenza A test and CVI within 7 days of movement.**
